

Do you really know what happened on 9/11?

- Did you know that the official theory of 9/11 in which terrorists conspired to demolish buildings by ramming planes into them is a conspiracy theory?
- Did you know that believing in this conspiracy theory makes you a conspiracy theorist?
- Did you know that a third building, WTC 7, a 47 story skyscraper not hit by a plane, fell on 9/11 in exactly the same manner as buildings brought down by explosives?
- Did you know that the Building 7's fall included at least 2.25 seconds of free fall and that this 2.25 seconds translates to about 8 stories?
- Did you know that free fall means there is nothing whatsoever in the way of the falling object?
- Did you know that if the official story is true 8 stories of resisting structure was removed simultaneously and continuously?
- Did you know that since it is impossible for fire to do this some massive extra amount of energy was involved?
- Did you know that because this energy is not accounted for in the official story this theory violates the laws of physics?
- Did you know that theories that violate the laws of physics are false?

Does it make you angry that 3000 people died on 9/11 because of a lie?
Does it make you angry that over one million soldiers and civilians have died in the middle east invasions resulting from 9/11 because of a lie?

If so its time to do something about it.
